Virtual Terminal

Virtual Terminal allows merchants to process ACH and Gift/Loyalty payments using a web interface through a PC

Benefits

- Eliminate hardware costs
- No additional software required
- Centralized transaction control and reporting
- No added cost for online reporting
- Training provided
- Verification services to minimize risk of bad checks
- Optional guaranteed funding on bad checks available

Program Options

- Web based terminal
- SwiftSettle

Optional Hardware Solutions

- Process checks using a PC as a terminal. Prints receipts through an attached printer.
- USB card reader or bar code scanner which simplifies data entry for gift cards.

Compatible programs

ACH Debit and Credit, Checks by Phone, and Gift & Loyalty.

Secure transactions

128-bit data encryption keeps transactions secure.

Web based

No additional software required.

Online Reporting

Web based reporting provides full transaction tracking with many features. Reconcile billing, view statements, transaction history, fast access to batch detail and much more.

Advanced customer management

- Populate returning customer information with the click of a button.
- Edit access level for your virtual terminal users
- Add clerks to process transactions online
- View demographic data of all gift & loyalty registered customers

Customization options

Manage user access and customize data inquiry fields for internal tracking like customer ID#, reference #, promo code, etc.

Perfect for any merchant accepting ACH payments.
